

Why Sims Recycling Solutions?

Sims Recycling Solutions works with its clients to establish the best routes for the recovery and recycling of a range of commercial and consumer products. Our processes are designed to best utilize the resources of redundant electrical and electronic equipment through its direct refurbishment and reuse or the recovery of the materials it contains.

Data Security

Our computer recycling and remarketing procedures are compliant with DOD 5220.22-M via secured shredding destruction of hard drives and NIST SP 800-88 Guidelines for Media Sanitization. We ensure confidential information on your hard drives is never compromised.

Process Controls

To ensure complete data security, environmental compliance, and a healthy workplace Sims Recycling Solutions continually audits its advanced procedures and processes.

No Landfill / Domestic Recycling

Preventing liability is your goal and Sims Recycling Solutions assures this. As a no landfill / no export recycler of electronics, you will never face environmental liability or negative publicity from the export of your products.

Customer Service

Our customer service department is recognized as one of the best in the industry and regardless of the volume of equipment you send us, you will always have a single point of contact with Sims Recycling Solutions through your dedicated customer service representative.

Cost-Effective Logistics

With multiple locations in North America, regional fleets, and extensive national and local freight alliances, we can provide customized logistic services at the most competitive rates.

Asset Management

Information is what you need to determine the value and final disposition of your assets. Sims Recycling Solutions offers a variety of information collection processes to help you catalogue the disposition and maximize the value of your assets.

Value-Added Services

Unit tracking, retrieval of itemized parts, audits and customized reports, warehousing and re-deployment are just some of the personalized services designed to meet your needs.
