Where are you financially right now?

Are you "doing okay" - or maybe even "rolling in dough" - but are on the lookout for another great stream of income anyway? That's a wise decision.

Or do you find yourself wondering what you're going to be doing in the next 30, 60 or 90 days, to get by?

Or possibly you've all but given up on trying to make money in this economy. Perhaps the job market, news and career woes of your friends and family have all made a huge withdrawal from your "hope account."

Well, no matter where you are in that range of scenarios, I have good news! This truly is a wealth generator—one that is absurdly simple to start up and operate!

Okay, but isn't it difficult to become successful in the stock market?

Yes, normally. It ordinarily takes long hours of painstaking analysis and a lot of experience. And is it expensive? It most assuredly is. And what about the odds of pass to fail? The truth is, 95% of traders lose money consistently, and the majority leave the markets.

But none of this need apply to you! With this amazing system, all of the guesswork and analysis has been done. And you are not about to get roped into expensive, advanced stock trading classes or dull, boring, hard-to-understand books.

Admittedly, there are many stock "gurus" out there. The mega-successful ones are few and far between. But there is a large number of successful traders out there! And although it's true that 95% of traders lose money in the market, and walk away dejected, The Chart Whisperer understands that.

And being one of the "fortunate few," he realized one day that a lot MORE traders continue entering the market with the best of intentions and stars in their eyes—only to become casualties of the Wall Street zero-sum game, suffering heavy losses. And he began thinking long and hard about that... he believes that a life is worth a lot more than another's profit. So he set out to make it easier—much easier—for the average investor to gain a better advantage in the market.

The solution? An easy-to-understand, simple-to-implement "set of notes." Notes that make it almost like reading over his shoulder... seeing his winning trades and looking at his entry and exit points!

No matter what your background or level of experience in trading—beginner, intermediate or advanced—The Chart Whisperer's notes are clear and easy to follow. There's educational value in every set, but you don't have to know the how and the why if you don't want to—or are just too busy. He has already given you the what and the when for everything he's researched and analyzed, so all you have to do is follow him into and out of the trades.

You'll see. It's like having an automatic wealth generator courtesy of Wall Street USA.

Isn't This Just Another "Stock Guru" Pitch?

You know that most of those successful stock market gurus have no intention of letting you in on what they're doing without your spending exorbitant amounts of money on their trading systems—because they're out to make a profit. That's the name of their game.

The Chart Whisperer rose up from the streets of Queens, New York. Everything he's gotten is something he's had to work very hard for. But he has also seen a lot of other good, hard-working people get clobbered in the market. So out of his blessings, he has decided to let you in on his secret—and his trades. You get to watch and participate in the making of fortunes! And you get to keep every cent. There's no downside!

That's what this Free Special Report is all about... the chance of a lifetime—The Chart Whisperer's gift to you... because he knows his system is a gateway to wealth, one you can use every trading day of every year.

Possibly you're a little concerned that once you get involved, it'll get a little scary. No, it's nothing like that.

Part of the good news is that all of the risk/reward ratios of each winning trade can be easily calculated. And the rest of it... the hard work, analysis and entry and exits? ALL of that has been done for you! All you need to do is

1. Read his notes
2. Call your broker or
3. Log on using your e-trading software
