

Dear {first name},

As you know, I come out with one new product a year - at most.

Yesterday I announced the official launch of a brand-new trading program that, in very short time, will totally change the way people look at the stock market – and this I promise you!

From the green beginner to the most advanced trader, there hasn't been a system this game-changing available EVER... except in our coaching circles here at Adam Mesh Trading.

Some have already become masters of their own destinies, financially-speaking – by using the rules, steps and techniques in this program.

But only a few. Most aren't even aware of what trading really entails, let alone that without certain data and facts, you're a goner and a loser in the market. As a result they lack the knowledge, control, focus and mastery that is absolutely required for ANYONE who wants to become successful in this new stock market.

On the other hand, there are the winners who know what's here. They have learned the control, the simple-to-master methods and for them, trading the stock market is a walk in the park.

They hardly spend any time trading. Just taking profits.

It's the stuff dreams are made of, really. I know... I'm one of the masters who regularly use what I'm about to reveal to YOU.

And there are the wonderful stories of winners... overcomers... stories of the light finally coming on for them. Stories of dreams dusted off and new levels of confidence. And new levels of income. Huge win ratios. It's a new day for trading.

I have always tried to be at the top of my game, and that's what we accomplish here—A-list coaching for traders.

But when my friend and fellow coach, [REDACTED], penned this extraordinary manual that traps the very essence of what we do here, in his system...

I knew that many more would become enlightened. And powerful. Because this kind of knowledge beats out anything else out there. Yet it comes dressed like simple rules, tips, charts, signals and filters.

But it's at the heart of the right way to trade – all of it. [REDACTED] has truly nailed it – distilled it. It's all in a fun-to-read, easy-to-learn new “trading manual.”

You will learn these simple, easy strategies so quickly, the results will astound you. The stock market will open up its doors to you and invite you in to take money home. This time you WILL have the keys to the vault.
