

You Have Before You the Only Road Map to Consistent Stock Market Profits that You Will Ever Need!

Most traders are losing traders. They're trading "the wrong way". There is only one right way for the "Average Joe" like me and the Wall Street Investor as well, to master the stock market—and pull out very consistent returns. It involves some very simple basics...

- Understanding specifically what works and what never works
- A system of checks, balances and easy-to-remember rules
- Exactly how to put all of that to work for you every time you trade

In a few moments I'm going to share with you how to amass a fortune greater than you ever thought possible—in just a few hours a week!

Hello my friend,

I'm very glad you took advantage of my offer to sign up and download the free excerpts from the ██████████ Trading Academy manual, the 5-minute Video Tutorial and this Special Report.

Now I have astounding information and a brand-new course to share with you—straight talk with no fluff or baloney. This is most definitely world-shaking stuff... because of the **POWER** it has to turn losers into winners in a very short amount of time. And how this works is surprisingly unique. Not that it's NOT being used to great degrees of success already—it just isn't widely TAUGHT! You see...

Once in a long while, something comes along in the financial world that has the potential for being a real life-changer for anyone who wants to make consistent wealth in the stock market. It's far from "the next new thing" - yet it contains the "trader's DNA" to open up untold numbers of profit opportunities that very few traders... very few... have ever seen before. And it's by no means complicated to learn.

I'm holding that "something" in my hand right now. And I want you to have a copy of it. If you are staring your future in the face today like so many in these tough economic times... and you're not sure about your financial years ahead... you should not be without this!

No matter what yesterday looks like...

No matter what your life, hopes or experience have been up till now... no matter how high OR low you've been feeling with the economic news... the volatile, teeming stock market... your own personal financial situation—and your confidence level... just sit back, relax, and read on...

Part of my gift to you was a segment from this astounding method for capturing profits - using a system that most traders know very little about. Now maybe you are an absolute beginning investor... or possibly you have just found yourself on the losing side of a rollercoaster ride in the stock market. No matter which one you are, today is the first day of your financial makeover!

I gave you a sampling of this very special program... but it's not magic. It just WORKS like magic! But it's not about the program—it's about what it does for YOU. All it takes is a little time, a little patience, a little discipline and a little trading capital. But then the fun begins... and once you get going with this you can take on Wall Street like a ninja—like I do. After that, you're on your way to wealth and rescuing those lost dreams!

Most traders are losing traders! Are you one of them?

Why do so many traders wind up losing money? Well, there are two reasons... if you're a losing trader, it's because

1. you lack the proper training to spot and position your trades for profit generation and preservation
2. your emotions are sabotaging your trading.

It's what I call "trading the wrong way" and it literally plagues the world of investors. But I have THE simple solution right here. In only a few hours, you WILL learn how to stop thinking and trading like a losing trader! Now it's time to turn the tables and trade the RIGHT way.

Your Great Adventure will begin as soon as you understand that mastery of the market is within your grasp right now!

I have coached thousands of students to all stages of success in trading. What I have before me are the "power tools" to **BUILD your incredible future!** And it will be simpler than you ever thought possible. Very soon you will be very sure of yourself and your new-found skills—you will...

- Zero in like a laser on consistent money-making opportunities
- Know exactly why you are picking this stock, that stock
- Watch your money grow like never before—into a fortune.

You will be learning control... of you AND the stock market... through time-honored, sure-fire analysis and rules. No hype, no fog, no uneasiness and no fear.

I mean every word of that. You see, I've been a real "possibility guy" - ever since the possible became the real for me a few years back, conquering the stock market.

The absolute thrill of new possibilities

I'm sure you remember your first "mountaintop experience" when you realized a powerful moneymaking opportunity was before you—and you saw yourself being able to do that thing.

I remember too. I recall the very day that I fully realized I had a tiger by the tail—and soon that tiger was totally under my control. I had found and used the tools, rules and power I needed to build an empire in my corner of the world. Doors were opening for me, opportunities were everywhere and the money began pouring in.

**"Find a job you like and you add five days to every week."
– H. Jackson Browne**

That's why I'm writing to you!

Maybe your mountaintop experience led you to a valley of unfulfilled dreams. But I'm here to show you how you can turn that corner and change everything. I learned many secrets on Wall Street that I used to turn my visions into reality... and I believe in sharing those secrets!

If you know about Adam Mesh, you know that I'm all about coming up with sound, honest solutions traders and investors can really use! That includes the best tools and coaching the world of Wall Street has ever seen. And boy, do I have something to show you now!

**Jump-start Stock Market Success and Trading Mastery right now.
Take advantage of this amazing offer... be one of 500 new Master Traders!**

Enter the Ninja Trader and Coach

A few years ago I met [REDACTED]. He has the businessman's mindset, a stellar aptitude for the stock market, and—like me he enjoys teaching and coaching. He began coaching for our group. And committed to becoming the best, [REDACTED] became a member of an "elite corps" of

Certified Market Technicians (CMTs). You see...

There are fewer than 2,000 of these amazing specialists the world over!

But that's not all... [REDACTED] is also my [REDACTED] Technical Analyst and [REDACTED] stock market coach. In the past 4 years he has personally coached over 1,200 students to success.

The day I read a game-changing note & manual...

Now very recently I received a note from [REDACTED] – and a book. The note read...

“Adam, read this and let me know what you think. You and I have had a lot of success trading - and we've taught a lot of others how to trade right, too. Well, I started thinking of all the traders out there who don't have the benefit of our coaching - they'll most likely just keep losing and quit one day. So I sat down and condensed everything I teach into this little book. I have a strong hunch it could be a game-changer! But not just for folks who're tired of trading and losing—I mean beginners AND advanced too! Everybody would be successful if they followed this! I've never seen a real live how-to manual for the stock market like this before, have you?”

Well, let me tell you...

He was most definitely onto something!

What I read in his “how-to manual” amazed me. For the first time here was a clear, concise distillation of everything you **SHOULD** be doing to beat the market. He'd nailed it... this was ‘the goods’ right here. These rules, tips, patterns, filters and techniques are what we call “the right way to trade”.

What [REDACTED] had written awakened me to this fact: Everyone who ignores these rules, steps, methods of analysis... and the other aspects found in this book—will never be winning traders! These are the ground rules. This is **EXACTLY** what **EVERY** investor should know—and every trader **MUST** learn.

I'm going to tell you all about that breakthrough “how-to manual” in this Special Report... and how YOU can learn and profit from everything that [REDACTED] and I teach in our coaching.

Everything you need to know about successful trading has been captured in this concise, easy-to-learn, fun-to-read booklet! Plus we are including a workbook to test your knowledge, and 2 hours' worth of video classroom training to tie it all together.

Introducing the [REDACTED] Trading Academy

MANY trading courses and systems have come and gone... but nothing captures the heart of the market quite like this. And that's just one of [REDACTED] Trading Academy's unique features!

Now you have the same opportunity that all our successful coaching students have—FINALLY you will learn how to “trade right”—because NOW you have the how-to, the when-to, when-not-to and the what-to-do! It's all in here in the [REDACTED] Trading Academy.

The trading manual can be read in a couple of evenings, and the workbook will hone your trading skills to razor sharpness. And the video tutorials illustrate everything in this course and bring it to life.

The [REDACTED] Trading Academy will change FOREVER how people approach investing—and make rich, successful stock market traders out of many, many Average Joes... Will you be one of them?

By the way... NO this will NOT be hard or take a long time for you to master! YES you do need time, patience and discipline to learn how to trade effectively and correctly—but not nearly as much as you might think! You see,

I firmly believe that most people can master the stock market – and trade successfully in just five hours a week!

You just need THE RIGHT MENTOR to come alongside and take you through the jungle. A master you trust who is also be a successful trader himself. The more you learn and practice, using the proper tools, the more confident you become. The more you take complete control and responsibility for your money and your future—using this program—the more wealth opportunities occur—thousands of them!

How it's done

There are very few people in this industry that can truthfully show you how to move past the noise and confusion—and beat the market consistently. We are part of that elite few. We teach and trade by a basic system incorporating a family of rules, technical signals, filters, chart patterns... plus it includes things you must always do and things you should NEVER do. And things you can sometimes do, depending on market conditions and known patterns. This knowledge and its application equip us to take consistent profits out of the market and trade with remarkable accuracy.

It's basic, specialized, applied knowledge... something that the

majority of traders lack.

Amazing fact (and great news!) You can learn today how FEW winning trades it actually takes to beat the stock market—and build your fortune! It's just one incredible myth-busting truth you'll read in the [REDACTED] Trading Academy. Click here to purchase your copy!

Buy Now

We're not looking for that next hot super-stock that the financial channel guy says will outperform everything else...

We're looking for Plain Jane stocks that give us return after return on excellent risk/reward ratios. We know exactly how to trade in any market, with almost any stock—and we pick winner after winner, over and over. It's an easy and wonderful way to make money!

"I have only had 2 sessions with [REDACTED] and he is really first class - I already feel order and control coming to my thinking. What you and your team are doing is fantastic - there is no other way ordinary guys can learn this way (I have looked!) ...I for one am so glad your course exists and that I finally signed up! Regards, Cain Ashworth, UK"

Please understand the impact of what I'm saying here—you can have it all as long as you have the road map. And we have the road map right here.

Picture it. You have the specific instructions on exactly how to build and run your own Wall Street Money Dynamo. You start off a little slowly and read very carefully. Then you begin putting everything together, learning more as you go. You pause, check everything over, grab some new skills and keep building. It's putting one foot in front of the other and it's all basic stuff. But does it ever work well! And soon you're working what you've built—and that's how you become a master of the stock market with the [REDACTED] Trading Academy. It's not hard to do at all.

This is the real deal. It is conceivably the very last stock market trading information you will ever need! Beginning with a small amount of money and armed with this information, you can write your own success ticket.

I PROMISE you will NOT have to

- attend any multi-thousand-dollar workshops
- invest in armloads of DVDs and thick books
- buy any fancy trading software
- subscribe to expensive live trading floor feeds
- try to decipher confusing, complicated graphs and calculations
- learn a whole boatload of stuff you'll hardly ever use or need.

You're reading here about how easy and simple this program is to learn and use. And that comes right from the author of the [REDACTED] Trading Academy, [REDACTED], who says...

"One thing I've learned in my trading and coaching that you can bank on—the simpler I've kept everything in trading, the better I've done. And I can vouch for the fact that many top traders and investors believe the same thing. Let's not complicate this. Let's start with the basics, which are what I give you right here in the [REDACTED] Trading Academy. In my manual, I teach you enough to go out and make a fortune in the stock market!"

What if you knew there was a certain kind of business...

where you didn't have to go into the office in the morning. You just "checked in" once in awhile - and with your newly-acquired knowledge and skills you could turn several thousand dollars into a fortune within a year... or less. How about \$25,000 \$40,000, \$75,000 or more in just a few months, working only from a phone or computer - from anywhere in the world?

And what if there was no real downside to this business - because for every dollar you put into the pot, you would receive \$5, \$15, \$20 or more back? How often would you want to do this type of business if you know you couldn't ultimately fail at it?

There are average traders just like you doing this every day... living their dreams and building financial empires from wherever they choose. I call that the BEST business you could be in!

You need this knowledge—and I believe it's REVOLUTIONARY, because people just aren't teaching you this... except us!

Why? That's hard to believe!

I agree... it IS. But do you know why no one else is teaching the simple-to-understand, simple-to-use and profitable basics we teach? The answer comes right out of the pages of [REDACTED]'s [REDACTED] Trading Academy manual. It's because ...

...simple and basic don't sell software.

Here is a course that's so clear and concise—but comes dressed as a a little honest education—the only education you'll ever need to trade successfully. And that just isn't sexy. It doesn't sell high-tech, glitzy, expensive, cool-looking, captivating, complex *trading software*.

You don't need bells and whistles. You need consistent profits, not noise and confusion! The [REDACTED] Trading Academy is not rocket science. The market is indeed a complicated machine, but not this! A high-tech, hot car is complex too, but if you learn how to handle it expertly, who cares about how complicated it is?

The [REDACTED] Trading Academy is simply the most effective way to take money out of the Stock Market with amazing regularity. Get your copy right now!

Buy It Now!

"Hi [REDACTED], just to let you know I think I finally am beginning to understand how to do this and make some money. Your Marketcast call today was on target. As you were wrapping up I entered ANR at \$55.02 for 100 shares; it hit at \$55.09 and jumped to \$53.48. Then it started dropping and I sold at \$56.37. As I am writing this to you ANR is down to \$55.34. It was Adam's suggestion yesterday that we take some short trades to make some money. I did and am happy. I have been sticking with the 3% stop loss and they work... I bought PCX the other day and managed to hold for a profit that started to deteriorate, so I sold with a \$50-plus profit. This morning I saw Pepsi discussing their drop in market and blaming it on their decision not to advertise on the Superbowl. Their stock is up \$0.28. Just like you have stated over and over, forget the news and talking heads... the market will do what it wants. Keep up the GREAT coaching and advice. I hope everyone really appreciates your expertise as much as I do." - Bob Huling

It's very important that you understand the impact the [REDACTED] Trading Academy will have on you as a trader. From the ground up you'll be quickly building a powerful storehouse of knowledge, analytical skills and market strategies. It's a foundation that's been ESSENTIAL in successful trading throughout the history of the stock market.

"I have only had 2 sessions with [REDACTED] and he is really first class - I already feel order and control coming to my thinking. What you and your team are doing is fantastic - there is no other way ordinary guys can learn this way (I have looked!) ...I for one am so glad your course exists and that I finally signed up! Regards, Cain Ashworth, UK"

The world of trading can quickly become busy enough to cloud out the basics—confusing you with so many bells and whistles—a whole lot of over-the-top, hamster treadmill stuff you just do not need. Worse, this stuff confuses the dickens out of new traders... and that usually equates to fear and loss!

But there's one thing even worse than the noise and fog obscuring one's trading... and that's not ever getting the basic facts & training in the first place!

[REDACTED] Trading Academy is NOT over-the-top, complicated or mind-numbing! The manual is a joy to read, since [REDACTED] wrote it in very conversational style. Reading it, you feel as if you're sitting at a desk with him having a friendly coaching session.

And the best thing?

It will encourage and empower you to become organized and take full and complete control. It doesn't matter whether you are advanced,

intermediate, or a complete beginner in the stock market—you will succeed if you apply everything [REDACTED] teaches in the [REDACTED] Trading Academy.

- **You WILL have a system you can use on any stock - ANY stock - that meets your requirements and qualifiers for profitable trades.**
- **You WILL learn EXACTLY how to qualify your own list of stocks.**
- **You can use this system in an UP OR DOWN MARKET - it doesn't matter.**
- **You WON'T have to sit in front of a computer screen for hours, day in and day out. Once you have decided what your trade(s) will be, all you do is put in your orders.**
- **NO daytrading, no nervousness, no fear... and no failure.**

It was Einstein who said, "The definition of insanity is doing the same thing you've always done and expecting a different result."

No one cares more about your money than you do

It's a fact that the old buy-and-hold rules most investors live by, no longer apply. For the security and growth of your money, you must understand that no one cares more about your money than you do!

Here's proof. Over the last ten years, the average return of the mutual funds has been \$0. Zilch, nada, bupkis, nuthin'. Yet... they have collected Billions of dollars in fees. In research done on the top ten mutual funds, investors have spent \$21.7 Billion to watch stocks go up and down, up and down. That doesn't even qualify as a dismal Return-On-Investment!

I've seen a sad thing that still pervades the industry. It's that the vast majority of investors do not want to take control of their investing and the management, let alone the control of, their money. There's just no way around it, my friend...

You have to take control to win.

Do you want financial success? Then take control and invest in YOU right now. Do you want to move past doubt, uncertainty, past failures, feelings of less-than, overwhelm, and even mediocrity—into a much brighter financial future than anything you've ever envisioned before?

Then join the scores of others who have taken control of THEIR money, time and lives. Enroll in the [REDACTED] Trading Academy and put your money to work building your new financial kingdom!

But it takes a lot of time to do this... right?

No, it most certainly does not! This is a course for busy people. [REDACTED] has already put in the time and the climb. He's reached the place where he can show you everything you will need to achieve success in the stock market. The learning can be a little slow in the beginning, but when you catch this, it roars off at 100 with you in control!

And one other thing about time...

As I said I am absolutely convinced that anyone can make handsome profits trading stocks with just five hours a week!

I love the stock market! It doesn't care how young or old you are, who you are, how many friends you have, your job history, your race, color, religion—the market has plenty of opportunities for everybody.

Do You Want Real Results?

If you have the desire to learn and succeed—and I believe you do—we will show you trading done the right way. It begins right here.

How would your life change if you knew you couldn't fail – and you had all the money you ever needed?

2 Crucial Questions for you...

What will your tomorrow look like? What will one year from today look like for you? Because it may just be downhill for you, financially, if you decide to do nothing about it today. And that is your greatest risk of all.

The [REDACTED] Trading Academy arms you with the most powerful knowledge, skills and trading tools available on Wall Street

In the 1990s when I discovered the power of the knowledge and tools I had, I began taking continuous profits and amassed a fortune. In one 20-minute time period I made \$19,743 as the folks from *Fortune Magazine* watched over my shoulder! We became known as the New Market Makers and that was only the first of articles about me in Fortune. In fact, a quote from Fortune Magazine reads, "Adam Mesh, for example, typically moves about 400,000 shares, although he's been known to handle a million." I was one smokin' market maker.

I had arrived - and understood for the first time that the way I traded could be reduced to a set of rules, technical charting aspects, guidelines and disciplines for every successful trader.

I built a trading firm with 60 traders and managed money—very large sums of it. With this system we were using, one of us had a whopping winning streak...160 consecutive trading days without a single loss! The stock market is immense, complex and extremely powerful. And like any economically-based machine, it generates winners and spits out losers at light speed.

But I had the keys to the kingdom! I had learned how to maximize every dollar and minimize losses. I knew when to trade and when not to. I was a master at beating Wall Street... and I'm just an Average Joe!

So with all this in mind, let me ask you...

If YOU had a program like this one—tweaked and honed to precision— that warned you about pitfalls up ahead to avoid – a system without all the noise, complexity and gizmos – brought to you in very do-able, uncomplicated steps, checklists and examples... what do you think the effect on your trading would be?

Even if you had just a FRACTION of the success that my team and I have had... how do you think your life would change?

I believe you know the answer to that question already. You see, a successful trader doesn't have to make \$19,000-plus every single time he or she makes a trade. Nor does anyone have to win every single trade for 160 straight days to do phenomenally well in the stock market.

"Adam, thanks for the pat on the back on ASIA but really it goes right back to you and [REDACTED]. It does feel good to know your system works for me too. I feel this trade is a direct result of things I've learned so far. I realize I have a ways to go so I am very open." - Rodney

Now it's YOUR turn to experience the mountaintop - by doing exactly what we do. You can dust off those financial goals and all of your dreams... it's time to follow a master trader on the path of trading success.

This is about you and your future—starting today. This is your ship come in, and you are at the helm—no one else! It's up to you, so grab the best learning material out there, approved by Adam Mesh Trading Group—the top-ranked stock market coaching guys on the planet.

Buy Now

The stock market has been moving wildly!

And even though you can't time the market, some stocks are moving from 2% to 30% in one week! This is a very special stock market with very special wealth opportunities—so it's time to get excited about what your life could be like just a few weeks from now! You can literally choose how high you want to go, because this course allows you to set your own limits.

Is there instant gratification?

No, you must learn first. But it's far easier and more enjoyable than you

can imagine. This is an exciting journey—and you get to watch your progress while master coach ██████ guides you.

Real Life Success Stories

█████ had a student back in 2009 that told him she was about to retire, and was worried about how to fund her retirement after the 2008 crash. After ██████ coached her, she mentioned that her financial advisor had made her 20+% on her accounts. But on her own, she had made over 250% that year based on what she learned from ██████!

Remember... this was AFTER the economy tanked! Now, based on what you will learn in the ██████ Trading Academy, how do you think YOU could do? And what could be possible once you knew that you could make these gains in an up or down market in any economy?

In 2010, another Average Joe told ██████ that at the beginning of his learning experience, he'd never made any money in the market. But in his final week of training, he was 4 out of 5 in his last 5 trades... and up an average of 21%!

And just about a month ago, Stephen had just finished up on his training. Prior to enrolling in ██████'s course had been breaking even in his trading. But just before finishing up he emailed ██████, showing all of his trades. He was something like 19 out of 21 winning trades!

Shown below is just one example of the many opportunities ██████ reports on. Soon YOU will begin spotting opportunities just like this!

“One trading opportunity that I'd like to review today is that of BKE (Buckle, Inc.). Before discussing, please review the 1 yr. chart of LTD that I have outlined below, with my added notations.

If you have read any of my previous Chart School newsletters, you will already know that I believe the simplest to be the best. In my experience with other traders, and students that I have coached to trade, the ones that kept it the simplest always seemed to do better than others who may have overcomplicated things a bit.

This simplicity is on full display when you look at the chart of BKE above. BKE had found support at \$35 for the last 4 months, which would have provided excellent

trading opportunities. However, BKE has recently broken out through a key resistance level of \$40 on route to a new 52 week high. With the market pulling back a bit over the past few days, BKE might also be pulling back. Since \$40 was a key level of resistance when the stock was below it, one could expect \$40 to act as a key level of support IF BKE pulls back down to it.

The Tale of the Tape: BKE (Buckle, Inc.) has formed key levels at \$35, \$40 and now possibly \$45 if the pattern holds true to form. If BKE were to pull back to \$40, entering a long position could be advised in expectation of a bounce higher. If instead BKE were to break above \$45, again, a long position could be entered.

What if BKE does come to \$40, but breaks lower? Traders could then enter a short position in expectation that BKE would continue down to the next level of support at \$35. A long position at \$35 could then be entered as well."

Do you see the \$5.00 profit potential on the long and/or short side—depending on which way this stock moves? We teach you how to spot opportunities like this every day... and sometimes we point them out!

In 6 months to 1 year, moves like these could easily lead to a six-figure account balance!

"What else will I learn in the [REDACTED] Trading Academy?"

Here's just a small sampling of what you'll learn...

- How to take every single bit of the guesswork out of trading.
- What is the most important factor in successful trading - and why it is NEVER emphasized in even the most sophisticated software programs
- Which stocks to NEVER trade
- Which situations allow the best opportunity to win, every time
- Where EXACTLY to look for the best stocks to trade - and where you can always – EASILY - spot the stocks that are potential winners
- How to know EXACTLY when to enter a trade, when to exit a trade, and how to ensure that you will protect and keep your profits
- The REAL percentage of winning stock pickers in the market
- The myth of "picking losers" dispelled! You will learn why so many traders lose, and EXACTLY what you will do to avoid losses.
- Which popular indicator of stocks is of little or no help at all in profitable trading.
- "Re-wiring" your brain to think like a professional trader. It's easier than you think!

"[REDACTED], I just thought I would update you on my progress. Since March 1, including open and closed positions, as of right now I have 18 winning trades... I am up \$850 on closed trades and I am up \$600 in open trades. Thank you."
- John Spann

Seize the Day! There's no better time

I'm sure that by now, you can see that the [REDACTED] Trading Academy is the ONE integrated approach to mastery and unqualified success for anyone at any stage of trading experience in the stock market. [REDACTED] undeniably has the "trader's DNA" that YOU need to learn how to take consistent profits from the market. So who would you rather have at your back—a TV software "stock guru" who says he's a master? Or a PROVEN

master - star coach - and successful trader at the top of this game?

Become one of the 3-5% select few who take money out of the market all the time. Learning how has never been simpler, easier, more fun or lower in cost than the [REDACTED] Trading Academy. Secure your place in this winning fraternity today.

Buy It Now!

You set the scene. Just imagine...

You haven't lived until you make money trading right from your favorite vacation spot! Or you may like looking over your stocks and orders on your iPhone or laptop while enjoying a calm morning outside at home... or at your local bistro or coffee shop. Or you could do like I do... call in your order while you're playing at the park with your children. YOU CAN TRADE ANYWHERE. With your new, carefree lifestyle, you will love it as much as [REDACTED] and I do ours.

But on the other side of this idyllic vision of freedom is something I DON'T want to see happen in your life! Let me back up just a bit and explain something...

The American Dream... and You

It wasn't long ago that unemployment was around 3%. Jobs were so plentiful that anyone could begin a career with a great company and stick with them for decades. Many saw the American dream as getting a good job, buying a home, raising a family, funding college, taking vacations, putting money into a promising pension—and eventually retiring with a well-to-do lifestyle.

Then in the 1990s the dot-com bubble burst. And even before the horrific shock of what was happening had even set in - the value of vast hordes of "sure-thing" retirement portfolios began emptying out almost overnight. Share values of buy-and-hold stocks plummeted. Companies went out of existence. Jobs were beginning their mass exodus out of the U.S.

Layoffs continued. Many older folks whose retirement dreams were now shattered had to go back into the workforce, often working at menial jobs at "big box" stores just to pay bills. Today, retirement for so many Americans is unsure or nonexistent. And most young Americans have no idea if - let alone when - they'll be able to retire with any guarantee of continuing benefits. The future is highly in question – it sounds like a recipe for broken dreams.

But I'm here to tell you... it DOESN'T have to be that way for you!

"██████████, I just wanted to let you know I made my first trade and it turned out great. I bought TPX on 3-31 after it held the \$50 level. I bought 100 shares at 50.86 and set my stop at 49.40. On 4-8 it gapped up to 58 and when I got home it was at 57.56 and I moved my stop to 56. I got stopped out the next day but cleared \$497. How about that - a home run in less than 10 days. I'm making myself stay patient and am not in a trade right now, but I've got my eye on a couple of stocks. Just wanted to share my first experience with you and say thanks again!" - David Shaw

Your Biggest Risk

The biggest risk you now face is the one you DON'T take to ensure a solid financial future for yourself right now. The way I recommend you build that future—and a phenomenal living right now besides—is to take the helm of a machine that will continually produce wealth for you. The stock market is just such a machine—the wealth generator of the Free Market Economy.

You see, the stock market ISN'T in a recession!

The Wall Street Money Dynamo is well-oiled and humming along quite nicely! Sure, the seas are heavy out there – but the stock market is one of the most dynamic, powerful forces in America today. Fortunes are being made regardless of the market conditions and the job situation. The ██████████ Trading Academy will teach you exactly how to take advantage of every opportunity you spot – and there are literally thousands of them!

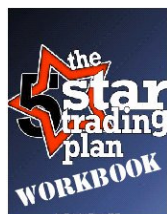

"Christian is a great coach. I had spent lots on other training but there was always something more the companies wanted you to buy, like software and more training. But your one training package covers everything and is so clear and easy to understand. If I can understand this then anybody can. Before your program I had doubts, being from another country where our dollar value is low... but I have not regretted it." - Bob Nand, New Zealand

Here's exactly what you will receive when you order the ██████████ Trading Academy...

The Manual

Learn exactly what you need to successfully trade like one of ██████████'s personally coached students. No other manual so concisely, so clearly teaches you the best of the basics to wealth in the stock market! Complete with charts and examples, the Manual includes: The 5 Step Approach to Trading - The Rule of 5 - 5 Important Price Patterns - 5 Common Mistakes that Traders Make.

The Workbook

This workbook tests your knowledge after studying the manual. And you can refer back to the workbook again and again to sharpen your aptitude. The workbook covers general questions, support and resistance, levels and chart patterns. And there's even a value-filled Special Bonus Section!

The video Tutorials

The [REDACTED] Trading Tutorials include 2 hours packed with superb, professional video training, taught by [REDACTED]. You'll see in real time exactly how a “ninja trader and coach” does it—and how you will too! Watch the “lights come on” for you as this video training ties the entire course together with real-life examples, trading sequences, explanations, illustrated price level and pattern scenarios—taken directly from performing stock charts.

Now it's time to put the [REDACTED] Trading Academy to work for you!

Remember: You're assured that the [REDACTED] Trading Academy will teach you what you need to go out and make a fortune in the stock market... simply, enjoyably and easily!

All you need to do is follow exactly what [REDACTED] teaches and you will learn – starting right now – exactly how to take control of the market and your money...

This program is most definitely worth as much money as those infomercial trading software “marketeters” are peddling their “bells and whistles” software for. But the truth is, it's worth far more. Most of those programs will relieve you of your hard-earned cash. The [REDACTED] Trading Academy reverses the trend and begins you on the road to true wealth!

I wanted to price this amazing course at \$497. But after a lot of deliberation I settled on \$247 for the entire breakthrough program.

But that would've gone against [REDACTED]'s desire to make this amazing course... and the opportunity before you now... affordable to the Average Joe.

So I'm going to charge only \$99 for the [REDACTED] Trading Academy Manual, Workbook and 2-hour Video Trading Tutorial. And that's a bargain for this life-changing, game-changing package!

But That's Not All You'll Receive...

Because we have something truly amazing and revolutionary that will launch you on a brand-new wave of trading success, we want to deliver ALL the value we can with it. So we want you to have something more—

I'm talking about [REDACTED]'s awesome Marketcast calls, conducted every Monday and Friday at 9am Eastern time. The incredible power of the [REDACTED] Trading Academy and your learning will come alive in a way you'd never believe possible - as you listen in on [REDACTED] while he discusses

new trading opportunities, charting – filters, levels, and what he sees on the horizon.

You will look with new-found recognition and confidence at opportunities never spotted before! The framework of successful thinking and trading will take shape in your mind more clearly than ever, as you see the details unfold.

"██████████, very good call this morning. I can't tell you how much it helps my mindset!" - Calvin Myers

MY BONUS

For the first 250 who order the ██████████ Trading Academy, I will include 2 free months' worth of ██████████'s Marketcast Calls! This is a \$295.00 value, and students receive thousands and thousands of dollars of potential profit value and education from every call!

BUT I can ONLY offer this BONUS to the first 250 who order the ██████████ Trading Academy. I'm afraid I'll have to withdraw this offer after the first 250 orders!

And because I believe you will succeed, I'VE ACCEPTED ALL THE RISK IN THIS OFFER. Learn the ██████████ Trading Academy. Watch the video tutorials, test yourself on your knowledge using the workbook – and listen to the Marketcast calls. Take 60 days. Give it your best shot. And if it hasn't begun revolutionizing your approach to the stock market or your thinking – then I will refund your money. No questions asked.

I am TREMENDOUSLY CONFIDENT that ██████████ Trading Academy is THE gateway to every stock trader's dreams come true!

Remember... even if you made only a FRACTION of the wealth that I have generated from my trading, you would be very well-off for the rest of your life!

I know for sure that ANYONE can learn how to trade the right way. I've seen thousands succeed using what ██████████ and I have taught... over and over, one trader at a time... and any one of them will tell you that the adventure and the risk are WORTH IT!

Take your first step on this Great Adventure and join us today.
